

Health Education

What is health education?

Knowledge of health topics allows community members to make informed decisions about their personal health, and empowers our community to act on health issues facing Lafayette County. Our department facilitates health education through social media, our website, events, work groups, presentations and other formats. Our department focuses on providing education on the following public health topics:

- Environmental health
- Maternal-child health
- Substance misuse
- Mental health
- Physical well-being
- Safety and emergency preparedness
- Infectious disease

Health Education Services from Lafayette County Health Department

Lafayette County Health Department offers health education services to the community on a variety of topics. Our department has worked with local businesses, schools, volunteer organizations and others to expand knowledge of health topics.

If your organization is interested in health education services from our department please contact us at (608) 776-4895 or [publichealth \[at\] lafayettecountywi.org](mailto:publichealth@lafayettecountywi.org)
